

Energy Position

PURPOSE

This document formalizes the Cintas commitment to responsible energy management.

SCOPE

This commitment applies to all Cintas operations and working Partners, as well the suppliers and vendors we work with every day. In addition, we support our customers' efforts in this area.

POSITION

Cintas is committed to responsible energy management through the following specific actions:

- We will evaluate our operations and identify opportunities for reducing energy use through improvements in process efficiency.
- We will work to identify ways to better utilize efficient energy sources for our operations.
- We will evaluate renewable energy options for our processes and fleet and utilize appropriate options where applicable.
- We will research new technologies to improve energy efficiency of our operations long-term.
- We will engage our suppliers and vendor partners to assist with this commitment through innovation in the products and services they provide us.
- We will encourage our suppliers and vendor partners to responsibly manage energy through improvements to their own operations and processes.
- We will collaborate with our customers to support their commitments and goals regarding energy management.
